## Product Description

### 10m 600 Led Smart Light Strip Set With 12v 24 Key Remote Control Ip65

#### Product Description:

These RGB LED ribbon lights each have 600PCS of LED, providing bright and vivid light that will definitely leave a deep impression on people. Whether you want to create a relaxed atmosphere in the living room or add some excitement to the bedroom, these LED light strips are the perfect choice.

With a width of 10mm, these LED strips are thin and inconspicuous, making them easy to install even in the narrowest spaces. You can choose 30 or 60 LEDs per meter, and you can choose the perfect brightness level according to your needs.

But the real advantage of these LED lights is their ability to change color. With a remote control and mobile app, you can easily switch between various colors and modes, allowing you to create the perfect lighting solution for any occasion.

So, why wait? Today, use our color changing light strips to add some color and excitement to your home or office!

#### Applications:

One of the most popular applications of these LED light strips is on home computers. Homeowners use them to create focal lighting in different spaces, including bedrooms, living rooms, and kitchens. They can be used to highlight architectural features, such as crown shapes or under cabinets, which can be controlled with dimmers to create a comfortable or romantic atmosphere.

Another common use of these LED light strips is in commercial environments. Restaurants and bars use them to create a lively and colorful atmosphere, while hotels use them to enhance the guest experience. Retail stores also use them to highlight products and create unique shopping experiences.

These LED light strips are also suitable for outdoor use. They can be used to illuminate courtyards, decks, and other outdoor living spaces, providing a warm and enticing atmosphere for gatherings and parties.

Due to their flexibility and ease of installation, these LED light strips can be used in various other scenarios, including car lighting, stage lighting, and even art installations.

Linkop's LC-SKS-BT-04-2 flexible LED light has passed CE certification and is manufactured in Guangdong, China, ensuring high-quality standards. Supply capacity of 200000 pieces/month, delivery time of 3-8 days, providing customers with timely and efficient services. The payment method is TT, providing customers with secure and reliable transactions. With a width of 10 millimeters, these LED light strips are both practical and stylish, making them a great choice for anyone looking for a multifunctional lighting solution.
