## Product Description

### Music And Voice Control Led Controller For Rgb Light Strips, Intelligent Bluetooth Mini Controller

#### Product Description:

The LED controller has a maximum load current of 12A, making it an ideal choice for both small and large lighting projects. The controller has three modes: "MUSIC", "Voice Control", and "Applicable types: RGB". The music mode allows your lights to synchronize with the music being played.

This LED controller is mainly controlled through a mobile phone, providing you with more options for remote control of lighting. This controller comes in black and white colors, with a wide input voltage of 5-24V for you to choose the most suitable for your needs.

You can easily adjust the brightness, speed, and color of the lights through your phone control.

Overall, our LED controller is a perfect solution for anyone looking for an easy-to-use and flexible way to control their light-emitting diodes. Whether you are a professional lighting designer or a DIY enthusiast, our LED controller is the perfect addition to your toolkit.

Product Name: led controller

Input port: DC

Working Voltage: DC5V-24V

Control Distance: 5-10 Meters

#### Technical Parameters:

Applicable types	RGB
Mobile app	Yes
Battery	No battery required
Mode	MUSIC
Change color	Yes
Smart Connect	Bluetooth APP
Input port	DC
Network Protocol	IR/RF
Max Load Current	12A
Remote control unit	No remote control

This is a Mini controller

#### Applications:

The Linkop LCSD-mini-BL-B RGB LED controller is a mini controller that perfectly controls your LED lighting system. This product is produced in Guangdong, China and has passed CE certification. The minimum order quantity for this product is 10 pieces, which are packaged in bags. The delivery time for this product is 3-8 days, and the payment method is TT. The supply capacity of this product is 300000 pieces per month.

The controller controls a distance of 5-10 meters. This product has a mobile application that allows you to control the LED lighting system through your phone. You can easily adjust the brightness of LED lights using a mobile application.

LED controllers are the perfect choice for various occasions and scenarios. This product is highly suitable for use in commercial environments such as retail stores, restaurants, and hotels. It can also be used in residential environments such as homes and apartments.

The remote control function of this product is very suitable for those who like to manually control LED lighting systems. For those who do not have mobile devices or do not like to use mobile devices, this feature is ideal.

This mini RGB LED controller is compatible with various LED lighting systems. For those who want to upgrade their current LED lighting system or are building a new one, this product is perfect.
