

## Motion Sensor Led Night Light With Adjustable Brightness Up To 10 Feet Range

Our Product Introduction

for more products please visit us on [ledslightstrip.com](http://ledslightstrip.com)

### Basic Information

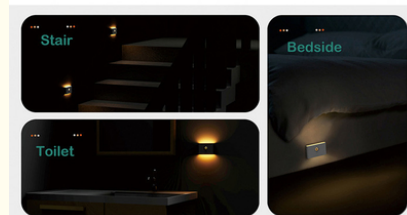

- Place of Origin: Guangdong, China
- Brand Name: Motion sensor cabinet light
- Certification: CE
- Model Number: LC-SP-SRX
- Minimum Order Quantity: 10pcs
- Price: \$4.8/Pcs
- Packaging Details: color box
- Delivery Time: 3-8 days
- Payment Terms: TT
- Supply Ability: 200000pcs/ month

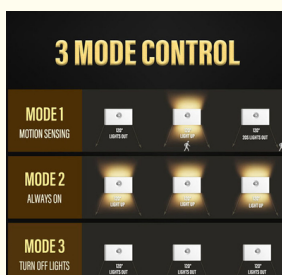

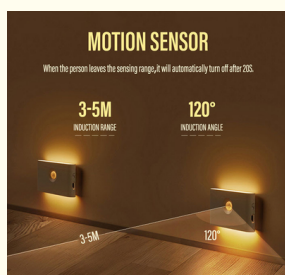

### Product Specification

- Size: Multi-specification
- Color Temperature: 3000K/4500K/6000K
- Input Voltage: 5V
- Sensor Angle: 120 Degrees
- Installation Method: Magnetic Installation
- Light Source: LED
- Sensor Range: Up To 10 Feet
- Application Scenario: Wardrobe/ Display Case/ Cabinet/ Desk/ Stairs/ Bedside
- Highlight: Motion Sensor Led Night Light, 10 Feet Motion Sensor Light, Adjustable Brightness Led Night Light

## Product Description

### Motion Sensor Led Night Light With Adjustable Brightness Up To 10 Feet Range

#### Product Description:

Our LED motion sensor light comes in various specifications to fit your specific needs. Whether you need a smaller light for your closet or a larger one for your garage, we have you covered.

The sensor type used in our LED cabinet light is PIR (passive infrared). This type of sensor detects motion by sensing changes in temperature, making it highly effective in detecting human presence and movement. The PIR sensor ensures that your LED motion sensor light will only turn on when it detects motion in its surrounding area.

The LED motion sensor light is made of high-quality ABS material, which is durable and long-lasting. ABS material is also known for its ability to resist impact and withstand harsh weather conditions, making it ideal for outdoor use.

One of the great features of our LED motion sensor light is its adjustable brightness. You can easily adjust the brightness of the light to your desired level, ensuring that it is bright enough to see what you need, but not too bright to be distracting or overpowering.

Our LED motion sensor light is perfect for use as a wardrobe light, cabinet light, or any other area that requires motion-activated lighting. With its easy installation and versatile design, it is a great addition to any home or office space.

#### Features:

Product Name: LED motion sensor light

Type: Motion Sensor Light

Size: Multi-specification

Sensor Range: Up To 10 Feet

Power Source: Rechargeable Lithium-ion Battery

Features:

Automatic light

Three color dimming (Color Temperature: 3000K/4500K/6000K)

#### Technical Parameters:

Material	ABS
Brightness	Adjustable
Power Source	Rechargeable Lithium-ion Battery (Large capacity battery)
Sensor Range	Up To 10 Feet
Color Temperature	3000K/4500K/6000K
Sensor Type	PIR
Application scenario	Wardrobe/ Display Case/ Cabinet/ Desk/ Stairs/ Bedside (Wardrobe light)
Waterproof	No
Installation Method	Magnetic Installation
Dimensions	One size
Charging Type	Type-C (Type-C charging)

#### Applications:

When you wake up at night and need to turn on the light while searching for the switch, it automatically lights up for you.

The Motion Sensor Cabinet Light is perfect for a wide range of application scenarios including wardrobes, display cases, cabinets, desks, stairs, and bedside tables. This versatile product is designed for easy magnetic installation, making it a breeze to set up and start using.

With an input voltage of 5V, this light is energy efficient and cost-effective.

# 3 Working Modes

**ON: always on light**

**OFF: off light**

**AUTO: Motion sensing mode**  
**(automatic turn off after 20s)**

## Charging with mobile phone TYPE-C cable

the light will automatically protect the current.  
No worries about buying and changing non-recyclable  
AAA batteries frequently at all.

Nanotechnology, the patch can be pasted repeatedly.

When the patch is installation wrong, or the use position of the night light  
needs to be moved after installation, the patch can be removed for reuse.

Note: Before reuse, please clean the patch, dry it, and then  
it can use repeatedly for 2-3 times

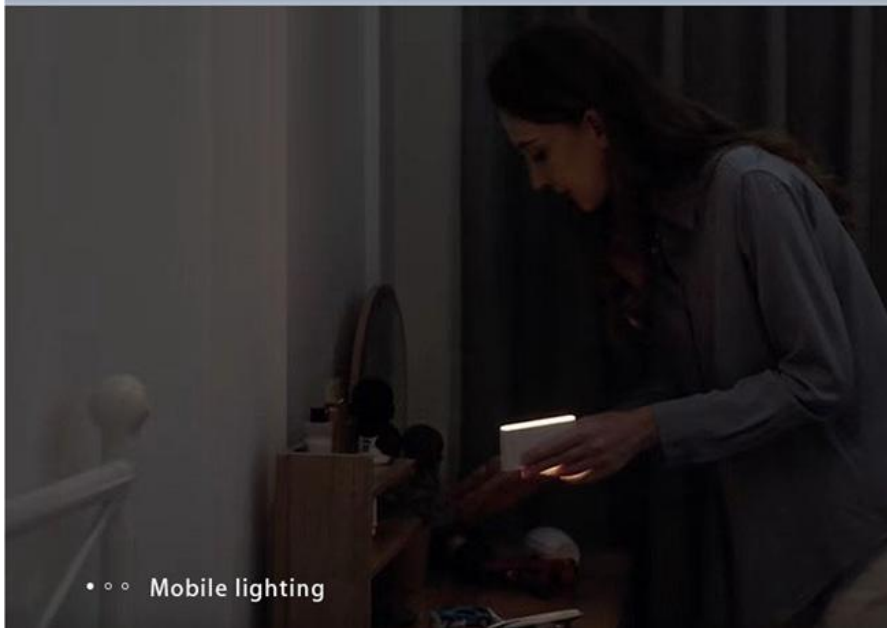

## Battery with Long Lifespan

Built-in 300mA high capacity lithium battery with good quality, customized 0.2W low-power and high-brightness LEDs.

1 hour charge for this rechargeable battery can last up to 3-4 months (20s/time; 4times/day) when choosing Auto Mode.

The normally on mode can be used for up to 20 hours after being fully charged.

• • • Toilet lighting

• • • Stair lighting
