Product Description

Flexible 6x12 Addressable Rgb Neon Light 5v Usb Led Strip Set

Product Description:

The rated power of LED neon lights is 10W/m, which has high efficiency and cost-effectiveness. This means you can enjoy bright and vibrant lighting without worrying about high energy bills. In addition, the product also offers RGB luminous colors, allowing you to choose from a wide range of colors and create stunning lighting effects.

LED neon lights are also dimmable, which means you can adjust the brightness according to your own needs. This feature is particularly useful for creating an atmosphere or highlighting specific areas of a space. In addition, the product is cuttable, which means you can customize the length to meet your specific requirements. This makes it an excellent choice for large commercial installations and small DIY projects.

The input voltage of LED neon lights is 5V. This makes it easy to integrate into your existing lighting system and ensures that you can use it anywhere you need it. In addition, the product is very durable and can withstand harsh weather conditions, making it an ideal choice for outdoor use.

In summary, LED neon lights are a multifunctional and energy-efficient lighting option that offers a range of benefits. It has a rated power of 10W/m, with RGB emission colors, adjustable brightness, and can be cut. Whether you are looking for neon cord lights, pixel neon lights, or silicone neon lights, this LED neon light is a great choice for a wide range of applications.
