24 Key Pcb Material Flexible Led Light Strip Set 30 Leds/M 12v Power Adapter

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Linkop
- Certification: CE
- Model Number: LCSD-24K-30D
- Minimum Order Quantity: 10set
- Price: $4.8/set
- Packaging Details: bag
- Delivery Time: 3-8 days
- Payment Terms: TT
- Supply Ability: 200000set/ month

Product Specification

- Width: 10mm
- Led Quantity: 30 LEDs/m
- Product Detail: Light Strip + Power Adapter + Controller
- Lifetime: 50,000 Hours
- Support Dimmer: Yes
- Leds: 30pcs
- Emitting Color: Cool White, Warm White, RGB For Options
- Size: 10mm
- Highlight: **Pcb Led Light Strip Set**, **12v Led Light Strip Set**, **30 Leds/M Led Light Strip**

Product Description

24 Key Pcb Material Flexible Led Light Strip Set 30 Leds/M 12v Power Adapter Ambient Light Strip Combination

Product Description:

The Light Strip is 10mm in size and is made of PCB material which is durable and long-lasting. It can withstand various temperatures and can be used for indoor or outdoor spaces. The Light Strip is also flexible which means it can be bent and shaped to fit any surface, making it easy to install in tight or difficult spaces.
The Power Input for this product is DC12V which is energy-efficient and cost-effective. It uses low voltage which means it's safe to use and won't cause any electrical hazards. The Power Adapter is also included in the package, which makes it easy to power up the Light Strip without needing to purchase any additional accessories.
The Light Strip comes with 30pcs of LEDs which provides bright and vibrant colors when turned on. The LEDs are energy-efficient and long-lasting which means they won't easily burn out or stop working. The Controller that comes with this product allows you to change the colors and patterns of the Light Strip, giving you full control over the ambiance of your space.
Overall, our Color-Changing Light Strips with RGB LED Ribbon Lights are a versatile and fun addition to any space. They are easy to install, energy-efficient, and offer a range of vibrant colors and patterns to choose from. Whether you want to add some mood lighting to your bedroom or create an ambiance in your office, these Flexible LED Lights are the perfect solution.

Features:

Product Name: LED STRIP LIGHTS
Lamp Body Material: PCB
Emitting Color: Cool White, Warm White, RGB For Options
Leds: 30pcs
Color: RGB
Power Input: DC12V
Features:
Dimmable LED Strip Lighting
Flexible LED Lights set

Technical Parameters:

Product Detail	Light Strip + Power Adapter + Controller
Width	10mm
Led Qty	150PCS
IP Grade	Waterproof IP20
Emitting Color	Cool White, Warm White, RGB For Options
Input Voltage	DC 12
Lifetime	50,000 Hours
Color	RGB
Size	10mm
Support Dimmer	Yes

Applications:

The RGB LED ribbon lights are a great addition to any room, creating a colorful and vibrant atmosphere. They are perfect for use in bars, clubs, restaurants, or even at home for parties and special occasions. You can choose from a variety of colors, including white light and RGB.
For those who prefer a more muted ambiance, the dimmable LED strip lighting is the ideal choice. These LED lights can be adjusted to the perfect brightness, providing a comfortable and relaxing environment. They are perfect for use in bedrooms, living rooms, and even offices.
The LED strip lights are also perfect for use in commercial settings. They can be used to light up display cases, shelves, and cabinets, showcasing products and creating a stunning visual effect.

With a lifetime of 50,000 hours, the LED strip lights are a reliable and cost-effective lighting solution. They are also CE-certified, ensuring high-quality and safety.
The minimum order quantity for the LED strip lights is 10 sets, with a delivery time of 3-8 days. The packaging details include a bag, ensuring that the product arrives in perfect condition. The payment terms are TT, and the supply ability is 200,000 sets per month, ensuring that there is always stock available.
In conclusion, the Linkop LED strip lights are the perfect choice for anyone looking for a flexible, reliable, and cost-effective lighting solution. Whether it's for a commercial or residential setting, the RGB LED ribbon lights, dimmable LED strip lighting, and other options are sure to meet your lighting needs.

FAULTS & SOLUTIONS

Fault Phenomenon	Cause Analysis	Solution
Light is not on	1. Switching power supply has no electricity 2. Power supply positive and negative poles are reversed 3. Wrong or not connected	1. Check the switching power supply 2. Corrected after inspection 3. Check the car wiring and connect it
The color is wrong	RGB line connection error	Recheck and connect the RGB lines
Some mode does not change	Speed is not adjusted	Press the speed button to speed up
Uneven LED brightness before and after	1. The output line is too long to have a voltage drop 2. The wire diameter is too thin to have a pressure drop 3. Power load overload	1. Shorten the circuit or ring power supply 2. Calculate the current, change the thick wire 3. Power supply with high power 4. Increase the power expander
Tips: The effective power of the switching power supply is only 80% of the power supply mark, so the user should select the power supply power more than the LED light load power, at least 20% more.
