Applications:

One of the biggest features of this LED smart light strip set is its remote control function. You can control it by connecting to a mobile app or through a remote control. Whether you are lying on the sofa or bed, you can easily change the color and effect of the light. In addition, it also has a music function. By playing music, the color of the light changes with the rhythm of the music, which is very magical.

These LED light strips are ideal choices for many different purposes. They can be used to create ambient lighting in bedrooms or living rooms because they are easy to install and can be cut to fit any space. They can also be used to highlight artworks or other decorative elements in the room. In addition, these lights can be used in commercial environments such as restaurants or bars to create a unique and enticing atmosphere.

The stickiness of these LED string lights makes them easy to install in various positions. They can be placed under kitchen or bathroom cabinets, or around the room to create soft lighting. They can also be used to emphasize outdoor spaces, such as terraces or decks.

These LED light strips have passed CE certification, with a minimum order quantity of 10 sets. Packaged in a bag, delivery time is 3-8 days. The payment method is wire transfer, and the supply capacity is 200000 sets per month. The power input of these lights is DC12V, with 60 LEDs per meter.

Overall, Linkop LED light strips are a versatile and useful product that can be used in various situations. Whether you want to create ambient lighting at home or add some style to your commercial space, these bonded LED string lights are a great choice.
