Product Description

Staircase Display Cabinet Application Scenario Dimmable Led Light Strip 220v Linear Light 2835

Product Description:

Our LED light strips are designed with a high quality IP42 rating, ensuring they are durable and have a long lifespan. This makes them perfect for both indoor and outdoor use. The IP42 rating means they are dust and water resistant, making them ideal for use in areas where they may come into contact with moisture.

The LED light strips are powered by DC220V, providing a reliable and stable power source. These lights are designed with a 2835 lamp profile, ensuring they are bright and efficient. This means they will provide plenty of light while consuming minimal energy, making them a great choice for environmentally conscious people.

The LED light strips are also very easy to install. They come with clips and screws, making them easy to mount onto any wood surface. This means you can quickly and easily add these lights to any room in your home without the need for a complicated installation process. Our rigid LED lights are very versatile, and with up to ten size options, they can be used in a number of different ways. They are perfect for use as accent lighting, providing a subtle and understated glow to any room. They can also be used to create a more dramatic effect, such as being used to highlight specific areas or features in a room.

For those who are looking for a more traditional lighting solution, our rigid LED rope lights are a great choice. These lights give off a warm and inviting glow, perfect for use in living rooms, bedrooms, and other areas of your home.

Overall, our LED light strips are a great choice for anyone looking to add a touch of style and ambiance to their home. They are durable, efficient, and very easy to install. Whether you're looking for a subtle, understated lighting solution or a more vibrant, colorful option, our LED light strips are sure to meet your needs.

Applications:

The Linkop LED Strip Lights are ideal for use in home and store display cabinets. They provide a bright and even light that illuminates products and items on display, making them stand out and look more attractive. The LED Strip Lights are also great for use in other settings, such as under cabinets, in closets, and in other areas where additional lighting is needed.

The Linkop LED Strip Lights are dimmable, which makes them perfect for use in situations where you need to adjust the lighting level. Whether you need bright light for task-oriented activities or a soft ambient glow for relaxation, these dimmable LED strip lights can provide the right level of illumination.

The LED Strip Lights are manufactured in Guangdong, China, and are CE certified. The minimum order quantity is 10pcs, and they are packaged in bags for easy transport and storage. Delivery time is 3-8 days, and payment terms are TT. The supply ability is 500,000 meters per month, ensuring that you can get the LED Strip Lights you need when you need them.

Overall, the Linkop LED Strip Lights are a great choice for anyone looking for a flexible and versatile lighting solution. Whether you need to illuminate display cabinets or add extra lighting to your home or office, these LED Strip Lights can provide the right level of illumination. Order yours today and experience the benefits of these high-quality LED lights!

PRODUCT DETAILS

Aviation aluminum

Made of high-purity aluminum - anti-rust and anti-oxidation, resistant to bending and deformation, good heat dissipation performance

Chip Capacitors

Adopt new type of patch fuse
anti-electric shock anti-fire
safer performance
