Product Description

168 Leds Per Metre Dimmable Neon Led Light For Your Satisfaction

Product Description:

The LED Neon Light is designed to operate at a working temperature range of -20 to 50 degrees Celsius, ensuring optimal performance all year round. This product is equipped with 168 LEDs per meter, providing a bright and even illumination that is suitable for a wide range of applications.

You can choose from three different colors for this product: Warm White 3000K, Neutral White 4500K, and White 6500K. Each color option is carefully selected to ensure that it can meet the specific needs of your project. With its lamp luminous flux of 22-26 Lm/led, the LED Neon Light offers a highly efficient lighting solution that is both cost-effective and environmentally friendly.

This 12V/24V neon light is easy to install and can be used for a wide range of applications, including signage, decoration, and accent lighting. It is suitable for both indoor and outdoor use, making it an ideal lighting solution for commercial and residential projects.

If you are looking for addressable neon lights or pixel neon lights, our LED Neon Light is an excellent choice. It can be easily controlled using a DMX controller or other compatible devices, giving you complete control over the lighting effects and patterns.

In conclusion, our LED Neon Light is a versatile and efficient lighting solution that can meet the needs of various projects. With its high-quality construction, energy-efficient design, and easy installation, this product is an excellent investment for anyone looking for a reliable and long-lasting lighting solution.

Applications:

Signage and Advertising: The neon tube rope light is an excellent choice for creating eye-catching signage for businesses, events and promotions. With its bright and vivid colors, this neon LED light is sure to stand out and attract attention. It is also easy to install, making it a great option for businesses that want to update their signage quickly and easily.

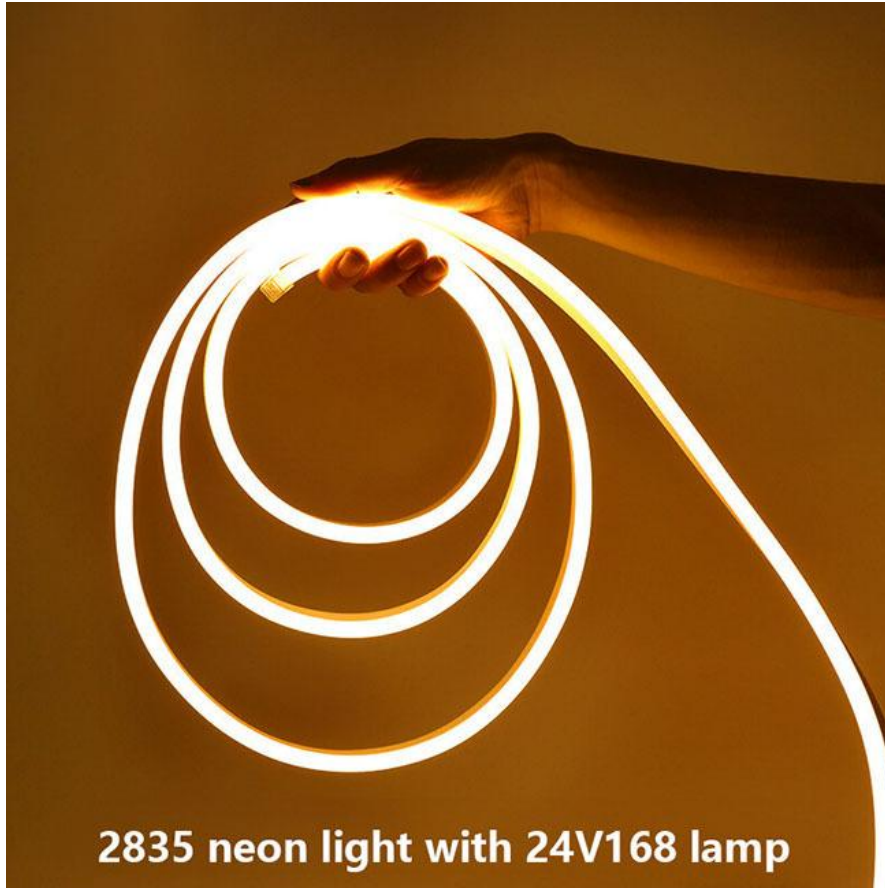

Decorative Lighting: The 12V 8*16 neon LED light is perfect for creating a fun and festive atmosphere for parties, events and holidays. Its customizable size makes it easy to fit into any space, and its IP65 rating ensures that it is safe to use both indoors and outdoors. This neon light can be used to create unique and creative lighting designs that will impress your guests.

Architectural Lighting: The neon LED light can also be used to highlight architectural features of buildings, bridges and other structures. Its bright and vibrant colors can be used to create stunning visual effects that will enhance the beauty of any structure. With its easy installation and low operating costs, this neon light is a cost-effective option for architectural lighting projects.

Retail Lighting: The neon LED light is also a popular choice for retail lighting applications. It can be used to highlight products, create eye-catching displays and draw attention to specific areas of a store. With its low heat output and long lifespan, this neon light is a great option for retailers looking to reduce their energy costs and maintenance expenses.

Linkop's LED Neon Light is CE certified and has a minimum order quantity of 50 meters. It is priced at \$1.2 per meter and is packaged in bags. Delivery time is between 3-8 days and payment terms are TT. With a supply ability of 200000 meters per month, this neon LED light is a great choice for businesses and individuals looking for a reliable and high-quality lighting solution.

Overall, the neon LED light is a versatile and cost-effective lighting option that can be used in a wide range of applications. Its easy installation, low energy consumption and long lifespan make it a popular choice for both commercial and residential applications.
